About Us

We're on a mission to empower micro-businesses by organizing the chaos of social media selling.

It started with a simple observation: independent sellers were drowning in manual tasks. A single order meant tracking bank receipts, copying shipping addresses from WhatsApp, and manually updating spreadsheets. Missed messages were leading to lost sales and human errors in shipping.

In 2026, we set out to build a better way. We created a centralized, lightweight web application that eliminates the noise. Now, sellers can focus on what truly matters: growing their business and serving their customers.
